Extended Pleated Air Filters

APPLICATIONS: Pleated air filters are widely used as pre-filters for higher efficiency filters or as final filters. When used as a pre-filter, these medium efficiency filters will add substantially to the life of the more expensive high efficiency filters.

When used as a final filter, these filters will be up to 2½ times more efficient than conventional filters. The 100% synthetic pleated design offers greater dust holding capacity and longer life. Generally, the deeper the pleats, the longer the filter will last between filter changes.

CONSTRUCTION: The pleated filter pack is enclosed in a heavy-duty, moisture resistant die cut frame that will not crack, warp, or distort under normal operating conditions. The pleated media is nonwoven, 100% synthetic engineered media, reinforced with galvanized expanded metal. UL Classified as to flammability only; Class 2 (R12347).
